VILLAS, MANSIONS AND CHÂTEAUX

SORHEA

LEADER IN PERIMETER PROTECTION **AT YOUR SERVICE**

The earlier you detect, the more you reduce the risk of intrusion and potential malicious acts or thefts on a site.

Perimeter intrusion detection on your premises allows for :

- **Advance warning of an intrusion,**
- **Early verification upon receiving an alarm notification,**
- **Early response triggered through the centralised alarm information system.**

Perimeter intrusion detection is our business. We have developed a wide range of technologies that includes wireless and solar powered systems, offering the most innovative solutions for protecting your critical infrastructure sites.

TECHNOLOGICAL ANSWERS TO MEET EVERY NEED

- **Intrusion detection** by active infrared non-physical (virtual).
- **Approach detection** by dual technology detectors and video analytics.
- **Intrusion detection and deterrence** by physical barriers: fence-mounted shock detection cables and electrified detection fencing.

COMMITMENTS THAT MAKE THE DIFFERENCE

- **Guaranteed quality** : over 30 years of experience in supplying our customers.

ISO 9001
BUREAU VERITAS
Certification

- **A customised service** to support you at every stage of your project.
- **On-site technical support** for engineering, pre-sales support and site commissioning.
- **A network of trained installers and integrators** worldwide.

PRESTIGIOUS PROJECTS

Having already protected more than 1,000 properties and estates in France and abroad, we have genuine expertise in protecting villas, châteaux and museums protection. Many public figures and VIPs have already trusted us to protect their properties. We pay close attention to the specific needs of each site and the various levels of detection required.

VILLA AND VINEYARD SOUTH EAST, FRANCE

TALPA + MAXIRIS

To protect this very large perimeter (the villa and vineyards of the estate), we installed TALPA, microwave cable. This solution is the most discreet on the market as the cable is buried underground: the system is completely invisible. To complete the intrusion protection, MAXIRIS columns provide detection for the entrance gates and car parks.

RENOIR MUSEUM, CAGNES-SUR-MER, FRANCE

TALPA

TALPA, our microwave cable, is one of the most effective underground cables on the market. It provides intrusion detection for the protection of artworks, while remaining invisible, so as not to spoil the charm of the Domaine des Collettes, the mansion in which the museum is located.

SEASIDE VILLA, FRANCE SOUTH EAST, FRANCE

MAXIRIS

This villa on the Côte d'Azur has a risk of intrusion from the sea. Very high performance MAXIRIS infrared columns were installed on outriggers to the pillars of a bridge and on a retaining wall of the villa to detect any attempts to climb up from the seafront.

ALL OF YOUR NEEDS ADRESSED, FROM APPROACH DETECTION TO INTEGRATION WITH YOUR ON-SITE SYSTEM

Particularly sensitive and delicate environments, such as villas, mansions and châteaux, require close attention to make them secure without spoiling the aesthetics of the place.
Depending on the layout of the estate and the level of security required, we offer four additional technologies that can be combined with our recommended solutions. These enable us to provide a very high level of security.

YOUR SPECIFIC
NEEDS

- Ensures **reliable detection** that provides **precise location of the intrusion**
- **Optimises alarm verification** via the video system

- Ensures a **discreet and aesthetic protection on façades**: customised painting on request

- Optimises protection of isolated zones: **gates, top of walls, roofs**

YOUR SPECIFIC
NEEDS

- Secures **long perimeters**
- Adapts to **different types of fencing**
- Limits the amount of **infrastructure**

- **Protects, detects and repulses** intrusions
- **Deters even before the intrusion**

- Secures **isolated zones** (gates, the back of a building)
- Ensures **approach detection**

OUR SECURITY SOLUTIONS

FOR YOUR VILLAS, MANSIONS AND CHÂTEAUX

- 1 ACTIVE INFRARED BARRIERS
- 2 SHOCK DETECTION CABLES
- 3 ELECTRIC FENCES
- 4 DUAL-TECHNOLOGY DETECTORS

For more than 30 years, our perimeter intrusion protection solutions have been proving their effectiveness in protecting private villas, museums and other mansions, based on your needs and the environmental conditions. This means we can provide solutions suited to the nature of your property (grass, all-weather surface, paving, multi-level, vegetation) to ensure complete protection.
