

Intrusion protection, detection and repulsion using a physical barrier

## SI-LOCK

Fence locking system

SI-LOCK detects any attempt to cross or cut a fencing panel. It prevents any attempt to dismantle it, thanks to a unique overhead 360° sensor at the centre of the panel, that can detect any movement.

### Product strengths

-  Triggers an alarm + repulsion function
-  Very low maintenance
-  Cannot be disabled from outside
-  Physical deterrence

360° detection sensor

## SI-LOCK

Alarm is triggered when overhead 360° sensors detect mechanical disturbance of a strand

Alarm is triggered when just a single strand is affected

Adapts to any type of existing fencing

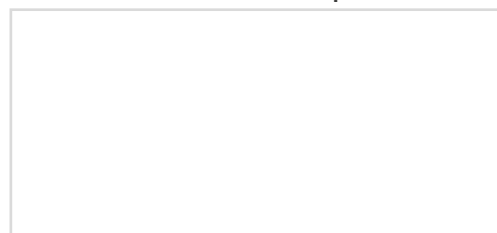

No risk to public rights of way

Visually unobtrusive
